Abstract— The progress of a country depends on the education and the education system depends on the Teacher. Teachers are the main pillar of any nation. They play crucial role in developing the skills and knowledge of the learner. It is the teacher who matters the quality of education. They are so many factors influencing directly or indirectly job satisfaction of a teacher. Therefore, it is very important to identify the factors which influencing job satisfaction of teacher. This paper trying to focuses on those factors which influencing job satisfaction of the primary school teacher of Dakshin Dinajpur district. To conduct the study a sample of 100 primary school teacher were taken from 25 Schools of Dakshin Dinajpur district.

### Indexed Terms-- Job Satisfaction, Teacher.

#### I. INTRODUCTION

Now a days, Job satisfaction has been a popular topic all over the world. Most of the Job performance of an employee depends upon one's level of job satisfaction. The organizational climate and the performance of an institute will increase if there is high level of job satisfaction. Job satisfaction is the combination of two level affective and cognitive. The affective level of job satisfaction is concerned with emotional feeling and cognitive level of job satisfaction is concerned with various type of benefits, such as leave, grants, scale of pay etc. Individuals who are satisfied with their present job incline to be internally motivated and will put more effort to increase their performance. The concept of job satisfaction is not only related to an individual but it also related to society's progress and well-being. It will help to ensure the productivity of the school and class performance. Like other countries, India also trying to improve the quality of education. Teacher would perform to their best level only, if they are satisfied with their job. So, satisfaction is an important psychological phenomenon in teaching profession.

• Review of Related Literature:

Job satisfaction is one of the core factors leading teaching profession. A lot of study has been conducted to know the factors of job satisfaction. Gupta (1988) found that job satisfaction and financial support influence in effective teaching. Naseema (1994) conducted a study on the relation between job satisfaction and teaching competency and found job satisfaction significantly influence effective teaching. Shann (2001) conducted a study on job satisfaction and found that teacher commitment and retention depend on job satisfaction.

Chawla and Tripathi (2015) conducted a study on job satisfaction among management teacher with a sample of 90 faculty member and found that there are 13 factors influencing job satisfaction of teacher.

- Objective of the study:
- 1. To study the validity of the factors of job satisfaction.
- 2. To find out the influencing factors of job satisfaction.
